(GN) of 141 ft. / 43m. Sometimes the ISO value will be stated, but if it isn't just remember that all guide numbers are calculated at ISO 100. The only value ever reported as the guide number is the flash to subject distance in both feet and meters. You'll note that the lens aperture used to calculate the guide number is left out of the reported value, which leads quite ...

### Flash Guide Number - The Digital SLR Guide

When setting photoflash exposures, the guide number (GN) of photoflash devices (flashbulbs and electronic devices known as "studio strobes", "on-camera flashes", "electronic flashes", "flashes", and "speedlights") is a

## Read PDF Electronic Flash Guide Number

measure photographers can use to calculate either the required f stop for any given flash-to-subject distance, or the required distance for any given f stop. To solve for either of these two variables, one merely divides a device's guide number by the other.

### Guide number - Wikipedia

As a method of standardizing the process, manufacturers use ISO 100 and a flash-to-subject distance of 10' as fixed reference points when calibrating guide numbers. An example of this formula: a flash unit with a GN of 40 would require an aperture of f/4 at a subject-to-flash distance of 10' ( $GN = 10' \times f/4 = 40$ ). Note: Some less-than-scrupulous (and invariably third-party)

# Read PDF Electronic Flash Guide Number

manufacturers use ISO 200 as their base, which automatically increases the apparent power of the flash unit.

## Understanding Guide Numbers | B&H Explora

Guide Number (GN) is a numerical method used to determine exposure of direct flash for Manual flash power levels, to automatically deal with the Inverse Square Law, making the math be trivial. The reference base is a known accurate Guide Number for one situation, from which other situations can be calculated.

distance \* f-stop. Your flash ' s Guide Number (GN) is determined at 100 ISO, when it gives correct exposure at a certain distance, multiplied by the f-stop

## Tutorial: How to use the guide number of your flash - Tangents

The effective range – and therefore the guide number – of any flash will be affected by the use of diffusers, soft boxes, or any other type of flash modifier, as well as whether the flash head is zoomed out or not. Also, remember that guide numbers are usually calculated based on a full-frame (35mm equivalent) sensor.

[Electronic Flash Guide Number - time.simplify.com.my](http://time.simplify.com.my)

A flash ' s power is determined by its Guide Number, with low Guide Numbers (GN) indicating a weak or less powerful flash than one with a high GN. For ease of comparison, most flash GNs are rated for an ISO 100 film. If you use a film with a lower ISO the GN

## Read PDF Electronic Flash Guide Number

will be lower, and, conversely, if you use a higher speed film the GN will be higher.

### Flash Photography - Understanding Guide Numbers

The key to using flashbulbs (or any manual flash system) is the concept of guide number. The guide number expresses the amount of energy contained in the flash in a way directly useful to the photographer, and relates distance covered to lens f-stop, as follows:  $F = G / D$  where F is the lens f-stop, G is the guide number, and D is the distance.

Guide Number Flash -  
[pekingduk.blstr.co](http://pekingduk.blstr.co)

A full-power flash from a modern built-in or hot shoe mounted electronic flash has a typical duration of about 1ms, or a little less, so the minimum possible exposure time for even exposure across the sensor with a full-power flash is about  $2.4\text{ms} + 1.0\text{ms} = 3.4\text{ms}$ , corresponding to a shutter speed of about  $1/290\text{ s}$ .

## Olympus T-20 Electronic Flash Technical Guide

The flash guide number (GN) is a measure of the distance at which the flash can illuminate a subject. The higher the guide number, the greater the distance at which the light from the flash is sufficient for optimal exposure. The formula for calculating the guide number is as follows: Guide number (GN) = distance (meters) × aperture (f-number)
