In real-life scenarios, service management involves complex decision-making processes usually affected by random or stochastic variables. Under such uncertain conditions, the development and use of robust and flexible strategies, algorithms, and methods can provide the quantitative information necessary to make better business decisions. Decision Making in Service Industries: A Practical Approach explores the challenges that must be faced to provide intelligent strategies for efficient management and decision making that will increase your organization ' s competitiveness and profitability. The book provides insight and understanding into practical and methodological issues related to decision-making processes under uncertainty in service industries. It examines current and future trends regarding how these decision-making processes can be efficiently performed for better design of service systems by using probabilistic algorithms as well as hybrid and simulation-based approaches. Traditionally, many quantitative tools have been developed to make decisions in production companies. This book explores how to use these tools for making decisions inside service industries. Thus, the authors tackle strategic, tactical, and operational problems in service companies with the help of suitable quantitative models such as heuristic and metaheuristic algorithms, simulation, or queuing theory. Generally speaking, decision making is a hard task in business fields. Making the issue more complex, most service companies ' problems are related to the uncertainty of the service demand. This book sheds light on these types of decision problems. It provides studies that demonstrate the suitability of quantitative methods to make the right decisions. Consequently, this book presents the business analytics needed to make strategic decisions in service industries.

Comprehensive and concise, Strategic Planning for Collegiate Athletics offers a step-by-step approach to planning and managing successful athletic programs. For athletic administrators at the collegiate level (and those in high school or recreational programs), this valuable resource will help you analyze your organization's environment, set objectives, decide on specific actions, and obtain feedback to create a dynamic plan for your department. Addressing the advantages of devising a blueprint for your athletic enterprise—such as knowing what to expect of colleagues and having a clear picture of future directions—Strategic Planning for Collegiate Athletics offers you easily implemented methods and suggestions to help your athletic department develop a map toward greater success and achievement.

This book proposes a theoretical framework identifying external and internal factors that influence internationalization strategy of Chinese brands and brand performance. It explores several key strategies e.g. standardization versus adaptation, price leadership versus branding, OBM export versus OEM export, and incremental versus leap-forward internationalization model. The relationships are examined between various international marketing mix e.g. distribution channel and pricing strategies, and brand performance. Through case studies the text also analyses the internationalization of contract-based firms.

James E. Austin ' s case studies are designed to help managers effectively compete in the Third World business environment. Designed for business school courses and in-house company training programs, this companion to Managing in Developing Countries presents 35 case studies organized around Professor Austin's Environmental Analysis Framework, a powerful, field-tested tool designed to help managers examine, prepare for and compete in the Third World business environment. Through comprehensive and thoroughly tested classroom-tested cases, Austin systematically examines the economic, political, and cultural factors of each country at international, national, industry, and company levels. The cases also reveal the critical strategic issues and operating problems that managers will encounter in developing countries--in governmental relations, finance, marketing, production, and organization.

With Strategic Planning for Private Higher Education you will improve your effectiveness in strategic planning to ensure the growth, success, and viability of your institution. The book ' s emphasis on tested techniques and the examples from the authors ' experiences in leading several private educational organizations give you the practical insight you need to learn how to benefit from strategic planning. The entire strategic planning process is covered--from vision casting to evaluation--for all types of private educational institutions, including colleges, universities, seminaries, graduate schools in education and business, and even K-12 academies. Strategic Planning for Private Higher Education will inspire you to make planning happen in a manner that will change the future and make a difference in the life of your institution. You ' ll see the strategic planning process from a senior administrator ' s perspective in real-time, with the idea of empowering all participating stakeholders for input and ownership of the process. This book shows education administrators, faculty, and students how to: develop a vision that is understood, shared, and acted upon create a mission that adequately communicates " who we are, " to be used in guiding every decision of the institution meet accreditation requirements of institutional effectiveness scan and analyze the external environment for changes that create either opportunities or threats to the institution establish and implement strategy, tactics, and action plans evaluate and control the strategic planning process assess the cultural and internal situation The book ' s end-of-chapter questions provide projects and assignments that reinforce the text materials. Also included are sample strategic plans for departments, schools, and colleges illustrating how to apply textual concepts and principles. Yet another valuable feature of Strategic Planning for Private Higher Education is its presentation of a " master " case study illustrating a number of key points, including: interaction between a college president and board of trustees, the use of a strategic planning task force to collect primary data and to expand participation, rewriting the mission statement of the college, and an illustration of a strategic planning calendar in relation to the budgeting calendar.
