Thermal and Statistical Physics. H. Gould, J. Tobochnik. Our goal is to understand the properties of macroscopic systems, that is, systems of many electrons, atoms, molecules, photons, or other constituents. Examples of familiar macroscopic objects include systems such as the air in your room, a glass of water, a copper coin, and a rubber band (examples of a gas, liquid, solid, and polymer, respectively).

I have been working on a project originally funded by an NSF grant to improve the teaching of thermodynamics, statistical mechanics, and statistical physics at the undergraduate level. Harvey Gould and I edited the December 1999 theme issue of the American Journal of Physics on these topics. We also started a new series of Gordon Conferences on Physics Education and Research and co-chaired the first one on statistical and thermal physics in June 2000.
