The Lenovo Way to Profitability and Growth In 2005, the Chinese corporation Lenovo acquired what was seen as a sacred American icon--IBM's personal computer business. It has since grown to become the world ' s biggest PC company and is now rapidly growing in the global mobile space. The Lenovo Way reveals practical methods for managing a truly diverse workforce operating around the world, drawn from both China and the United States. Gina Qiao is Senior Vice President of HR at Lenovo. Yolanda Conyers is Vice President of HR Operations and Chief Diversity Officer at Lenovo.

Provides information on how to upgrade, maintain, and troubleshoot the hardware of laptop computers, discussing the differences among them as well as their various configuration options.

Low-tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practices. Sometimes, past technologies can be copied without any changes. More often, interesting possibilities arise when older technology is combined with new knowledge and new materials, or when past concepts and traditional knowledge are applied to modern technology. Inspiration is also to be found in the so-called "developing" world, where resource constraints often lead to inventive, low-tech solutions. Contains 159 images in black & white.

A personal energy training program outlines strategies on how to prevent burnout and improve productivity, discussing such areas as how to work with four key sources of energy, balancing stress and recovery, expanding capacity, and implementing positive routines. Reprint. 60,000 first printing.

A series of responsive prayers written for use in communal worship, and based on the books of Proverbs.

People often believe that we can overcome the profound environmental and climate crises we face by smart systems, green innovations and more recycling. However, the quest for complex technological solutions, which rely on increasingly exotic and scarce materials, makes this unlikely. A best-seller in France, this English language edition introduces readers to an alternative perspective on how we should be marshalling our resources to preserve the planet and secure our future. Bihouix skilfully goes against the grain to argue that ' high ' technology will not solve global problems and envisages a different approach to build a more resilient and sustainable society.
