Multiply as you would with two whole numbers. Count the number of decimal places in both factors. Use that number of decimal places to write the answer. 0.72 23 216 144 1656 16.56

Name 4-5 Multiplying Decimals - Peters Township School ...

How to Multiply Decimals. Just follow these steps: Multiply normally, ignoring the decimal points. Then put the decimal point in the answer - it will have as many decimal places as the two original numbers combined. In other words, just count up how many numbers are after the decimal point in both numbers you are multiplying, then the answer should have that many numbers after its decimal point.
