This book is a timely response to a rather urgent call to seek an updated methodology in rereading and reappraising early Chinese texts in light of newly discovered early writings. For a long time, the concept of authorship in the formation and transmission of early Chinese texts has been misunderstood. The nominal author who should mainly function as a guide to text formation and interpretation is considered retrospectively as the originator and writer of the text. This book illustrates

that although some notions about the text as the author ' s property began to appear in some Eastern Han texts, a strict correlation between the author and the text results from later conceptions of literary history. Before the modern era, there existed a conceptual gap between an author and a writer. A pre-modern Chinese text could have had both an author and a writer, or even multiple authors and multiple writers. This work is the first study addressing these issues by more systematically emphasizing the connection of the text, the author, and the religious and sociopolitical settings in which these issues were embedded. It is expected to constitute a palpable contribution to Chinese studies and the discipline of philology in general

These essays represent a summation of Piotr Steinkeller's decades-long thinking and writing about the history of third millennium BCE Babylonia and the ways in which it is reflected in ancient historical and literary sources and art, as well as of how these written and visual materials may be used by the modern historian to attain, if not a reliable record of *histoire événementielle*, a comprehensive picture of how the ancients understood their history. The book focuses on the history of early Babylonian kingship, as it evolved over a period from Late Uruk down to Old Babylonian times, and the impact of the concepts of kingship on contemporaneous history writing and visual art. Here comparisons are drawn between Babylonia and similar developments in ancient Egypt, China

and Mesoamerica. Other issues treated is the intersection between history writing and the scholarly, lexical, and literary traditions in early Babylonia; and the question of how the modern historian should approach the study of ancient sources of "historical" nature. Such a broad and comprehensive overview is novel in Mesopotamian studies to date. As such, it should contribute to an improved and more nuanced understanding of early Babylonian history.

This book presents intentional dynamics, which is a new perspective on TESOL contexts, activity and outcomes. The key innovation is a synthesis of complex systems and ecological theories, as well as the concept of intentionality from the

philosophy of mind, to understand the psychological and social processes of TESOL. One aspect of intentional dynamics is the 'ordinary' intentions of individuals to perform particular actions, and of organisations to achieve planned outcomes. Another aspect is philosophically defined psychological and social forms of intentionality. Psychological intentionality is understood as what language learners' and teachers' (and other stakeholders') beliefs and emotions are 'about' or 'directed at'. Social intentionality is the 'aboutness' expressed by TESOL materials, curricula and policies. The book explores how intentional dynamics both emerge from and give shape to TESOL activity, and outlines what are the practical implications of

intentional dynamics for TESOL learners, teachers, researchers, managers and policy-makers.

Dragons, giants, and the monsters of learned discourse are rarely encountered in the Sagas of Icelanders, and therefore, the general teratological focus on physical monstrosity yields only limited results when applied to them. This, however, does not equal an absence of monstrosity – it only means that monstrosity is conceived of differently. This book shifts the view of monstrosity from the physical to the social, accounting for the unique social circumstances presented in the *Íslendingasögur* and demonstrating how closely interwoven the social and the monstrous are in this genre. Employing literary and cultural theory

as well as anthropological and historical approaches, it reads the monsters of the *Íslendingasögur* in their literary and socio-cultural context, demonstrating that they are not distractions from feud and conflict, but that they are in fact an intrinsic part of the genre 's re-imagining of the past for the needs of the present.

This book investigates formal characteristics and discourse functions of linguistic creativity at the level of idioms in spoken ELF as represented in the Vienna-Oxford International Corpus of English (VOICE). Building on the findings of previous ELF research, the book proposes that creativity might serve as a fundamental concept in accounting for the variation that

seems to be central to describing and understanding English as a lingua franca.

Humor may surface in numerous and diverse contexts, which at the same time determine how humor works, its form, and its functions and consequences for interlocutors.

Adopting a sociolinguistic and discourse analytic perspective, this study is aligned with approaches to humor exploring the variety of humorous genres, the wide range of sociopragmatic functions of humor, and the more or less dissimilar perceptions speakers may have concerning what humor is, what it means, and how it works. The chapters of this book propose a new theoretical approach to the analysis of humor by bringing context into focus.

Furthermore, the study explores how we can teach about humor within a critical literacy framework creating classroom space for everyday humorous texts that are part of students' social realities, and simultaneously taking into account that humor may yield multiple, disparaging, and often conflicting interpretations. This book is intended to appeal to humor researchers from various disciplines (such as linguistics, media studies, cultural studies, literary studies, sociology, anthropology, folklore) as well as to professionals or researchers in education.

This is a timely and affordable study guide for the PRAXIS 5001 teacher certification test. Testing of new standards begins August 2015. This is the only product on the market that

has EXPANDED, aligned content and a full sample test with answer explanations. Many states -- but not all -- that formerly required 5031 have adopted test 5001. Changes include almost doubling the coverage of content. The skills have expanded in ELA and math. The test formerly had 210 questions and now has 235 questions. The number of social science questions will be reduced by ten questions. This product provides a highway to success, quickly and efficiently gathering more content succinctly, including each of the four subtests, aligned expanded descriptive statements, with their corresponding numerous and authoritative examples. Since Praxis 5001 is an unusually long test, it is in the candidate's best interest to augment this study guide with our additional suite of digital

products which include interactive bundled tests that are comprised of questions from three tests, that include time on question as well as time on test. By contrast, this product is not a broad review of subtests with generic videos or generic categories clustered under subtests, because it defeats the purpose of PRAXIS specificity. Our sample test questions are aligned to specific skills. In conclusion, this product is unique because of its specific content, unpacked deliberately, with standards-aligned sample test questions and explanations. Common Core standards have been added."

Contemporary theories on complex adaptive systems stem from a natural science perspective. Paul Cilliers was one of the first complexity thinkers to

translate the theoretical concepts into a qualitative and normative understanding of complexity. This collected volume of essays consolidates his later work. The introduction by Preiser and Woermann reflects on the significance of his contribution within the broader field of complex systems thinking.
