Four episodes in the adventures of Winnie the Pooh and his friends, based on the four cartoons made by Walt Disney.

Although Walt Disney is best known as a filmmaker, perhaps his greatest skill and influence was as a reader. While many would have regarded Felix Salten's *Bambi* and Carlo Collodi's *Pinocchio* as too somber for family-oriented animated films, he saw possibilities in them. He appealed to his audience by selecting familiar stories, but transformed them to suit audience sensibilities. Many of the tales he chose to adapt to film went on to become the most read books in America, eventually becoming literary classics. Although much published research has addressed his adaptation process--often criticizing his films for being too saccharine or not true to their literary sources--little has been written on him as a reader: what he read, what he liked, his reading experiences, and the books that influenced him. This collection of essays addresses Disney as a reader and shows how his responses to literature fueled his success. Essays discuss the books he read, the ones he adapted to film, and the ways in which he demonstrated his narrative ability. Exploring his literary connections in reference to his animated and live-action films, nature documentaries, theme park creations, and overall creative vision, the contributors provide insight into Walt Disney's relationships with authors, his animation staff, and his audience.

When Walt Disney died in 1966, many predicted that it might be the end of Walt Disney Productions, but Walt had a number of ideas and concepts that lasted well into the next decade. He also left behind a well-established group of workers that hoped to continually answer the question, "What would Walt do?" with more magical creations that would dazzle and delight. With this book, author and historian Mark Arnold explores the major accomplishments of Walt Disney Productions during the years 1966 – 1985, paying particular attention to their theatrical film output, but also discussing the various new theme park attractions and the TV shows produced during that period. Things went well until the mid-1970s, when ideas started to run thin and repetition set in, causing shrinking box office success. By the 1980s, threats of corporate takeover were knocking at their door, at which time change had become unavoidable if Disney were to survive as an independent company.
